BWC wants more awareness on Fire Safety

As part of the continuing capacity-building program of the Bureau, the BWC staff attended a Fire Safety training conducted by Petron Philippines.

Senior Safety Specialist II, Mr. Emerson M. Tera of Petron Philippines emphasized that fire can spread rapidly, that's why it is important to know fire safety information because it saves lives. He presented what causes fire, various fire safety procedures, useful tips on how and when to use a fire extinguisher and other important fire hazards and safety equipment.

This environment-friendly initiative seminar was conducted for the BWC employees to be equipped with knowledge and skills on how they can prevent injuries and save lives and structures during fire.

Mr. Tera pointed out that education on fire safety must not only be disseminated to employees in place of employment but also in everyone's home.
