DOLE-BWC CONDUCTS 4-DAY TSI TRAINING FOR NEWLY-HIRED ENGINEERS

In line with the continuing capacity-building activities for the labor inspectorate, the DOLE-Bureau of Working Conditions organized a four (4)-day Technical Safety Inspection (TSI) training for newly-hired mechanical and electrical engineers. The training took place on 25-28 February 2020, in Pagbilao, Quezon and was participated by twenty (20) mechanical engineers and ten (10) electrical engineers.

The primary objective of the 4-day TSI training is to build and enhance the competency of the DOLE's new labor inspectors. Specifically, the training course aims to orient its participants on the proper conduct of TSI by providing them basic knowledge on mechanical equipment and electrical wiring installations, safety operating conditions of mechanical and electrical units, and the application of inspection techniques and professional judgement in the course of inspection in accordance with the *DOLE Technical Safety Inspection Manual* and other existing rules and standards.
