BWC Conducts Half-Day Webinar on Processing, Clearing, and Approval of Plans

On 06 December 2021, the Bureau of Working Conditions held a half-day webinar entitled “DOLE’s Processing of Application for Fabrication, Installation of Mechanical Equipment, and Electrical Wiring.”

The webinar is in line with the Bureau’s continuing efforts to further improve service delivery in raising awareness, appreciation, and inculcation of higher compliance with Occupational Safety and Health Standards.

Professional engineers, Melanie Banayos and Gilbert Marquez, and registered engineers, Ma. Kristina De Guzman and Gorgonio Bello, acted as resource speakers of the webinar.

The half-day webinar comprehensively discussed the following topics: (a) Introduction to Technical Safety Inspection, (b) evaluation process, and (c) issuance of Permit to Operate and Certificate of Electrical Installation.

“The DOLE, particularly the Bureau, highly upholds the value of building a culture of prevention and safety and health at work. We must make safety and health our way of life,” Assistant Secretary Ma. Teresita Cucueco said in her welcome remarks.

She added, “To make workplaces safe, every single person in that place must adhere to and practice OSH, visitors included. Everyone must act collectively so we can protect each other so we can come home to our families safe and healthy, more so in these trying times.”

Due to the limited capacity of the Bureau’s Zoom account and the stakeholders’ overwhelming interest to join the webinar, the same was streamed through the Bureau’s Facebook page.

As of 29 December 2021, the webinar has 161 peak live views and a reach of 8,017. The former refers to the highest number of concurrent viewers at a given time who viewed the live video for at least three (3) seconds. On the other hand, the latter refers to the number of people who saw the content at least once.
